Application/Control Number: 09/800,965

Art Unit: 3625

## **DETAILED ACTION**

## Election/Restrictions

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1,4,9,10,15,19-24,28-34,49-50,55-56,58-66 drawn to gateway apparatus and network system, classified in class 705, subclass 26
- II. Claims 2,3,5-8,11-14,16-18,25-27,35-48,51-54,57 drawn to a method for processing an order in a network classified in class 709 subclass 219 and class 707 subclass 10.
- 2) Inventions I and II are related as subcombinations disclosed as usable in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has a separate utility as a hardware description of a gateway apparatus in a network system. See MPEP Sect 806.05(d).
- 3) Because these inventions are distinct and have acquired a separate status in the art as delineated in their separate classifications, restriction for examination purposes is proper.
